Tanay

Data Engineer | Fresher

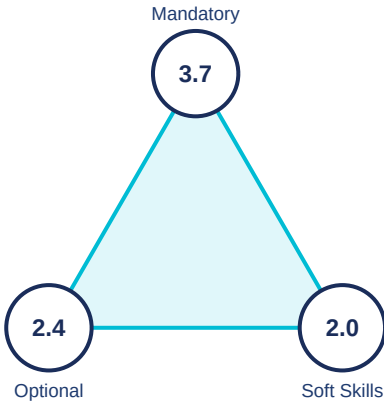

Company: Kadel Labs | 2026-05-20

6.6
/ 10
OVERALL

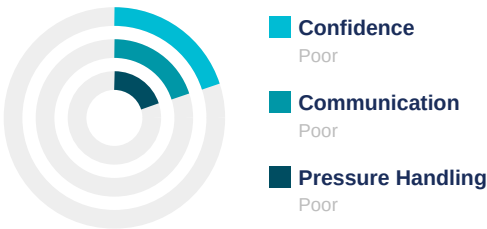

Resume Summary

- Tanay is an accomplished Data Engineer at the Fresher level, leveraging expert-level knowledge in SQL. Throughout the evaluation, the candidate demonstrated a high-caliber technical methodology and an ability to articulate complex architectural decisions. Their professional candidacy is defined by a strong orientation toward scalable solutions and executive-level communication.
- Strategic Focus: Built dynamic prompt engineering logic to generate structured output containing question text, four options, correct answer, explanation, difficulty level, domain name, and topic mapping
