EDUCATION

Geetanjali Institute of Technical Studies Bachelor of Technology - CSE; CGPA: 8.39	Udaipur, India 2022 - 2026
Saint Paul Convent School Senior Secondary - Mathematics; CGPA: 7.30	Jaora, India 2020 - 2022

SKILLS SUMMARY

- **Programming Languages:** Python, SQL, C++
- **Machine Learning & AI:** Scikit-learn, TensorFlow, NLP, LangChain, Machine Learning Algorithms
- **MLOps & Data Engineering:** DVC, MLFlow, Apache Airflow, Databrick, Apache Spark, PySpark, Kafka
- **Data & Visualization:** Pandas, NumPy, Matplotlib, Power BI, SQL Server, Snowflake
- **Backend & Cloud:** Flask, Streamlit, Azure, AWS
- **Tools & Platforms:** GitHub, Jupyter Notebook, VS Code, PyCharm, Google Colab
- **Core Concepts:** OOP, Database Management Systems, Computer Networks, Data Structures
- **Soft Skills:** Problem Solving, Time Management, Teamwork

PROJECTS

- EduMetrics Data Engineering Pipeline**
Tech Stack: PySpark, Databricks, SQL, Python, Azure Data Lake Storage, GitHub
- Designed and built a **data engineering pipeline** to process and analyze school performance data from CSV files.
 - Performed **data cleaning, validation, and transformation using PySpark** to handle missing values and data quality issues.
 - Implemented **aggregations such as average score and pass rate analysis** to generate meaningful educational insights.
 - Stored the processed data in **Parquet format in Azure Data Lake Storage for scalable and efficient analytics**.
 - Developed the pipeline in **Databricks and maintained version control using GitHub**.
- TARS AI Web App**
Tech Stack: Python, RAG Pipeline, Vector Database, Streamlit, Machine Learning, Tesseract OCR
- Architected an **offline document intelligence system** using **Llama 3.2 and a RAG pipeline** to extract and analyze information from PDFs, documents, and images.
 - Developed a **web application** allowing users to upload multiple file formats and perform intelligent Q&A.
 - Implemented **OCR-based document parsing** and vector embeddings for context-aware responses.
 - Optimized the **RAG pipeline and local inference workflow** for efficient offline AI processing.
- Twitter Sentiment Analysis Pipeline**
Tech Stack: Python, Machine Learning, DVC, MLflow, Scikit-learn, NLP, YAML, Logging, Git
- Engineered an **end-to-end NLP-based Twitter sentiment analysis pipeline** with modular stages for data ingestion, preprocessing, feature engineering, model training, and evaluation.
 - Implemented **ensemble learning techniques** to improve model robustness and classification performance.
 - Automated the complete ML workflow using **DVC**, with **centralized configuration management via YAML** for reproducibility.
 - Tracked experiments, metrics, and model versions using **MLflow**, with unified logging for monitoring and debugging.

CERTIFICATIONS

- Programming in Python (Udemy)**
- *Gained proficiency in advanced Python, including data structures, object-oriented programming (OOP), and performance optimization techniques.*
- Data Science & Machine Learning (Udemy)**
- *Acquired hands-on knowledge of **supervised and unsupervised learning**, feature engineering, model evaluation metrics, and end-to-end ML pipeline development.*

ACHIEVEMENTS

- SMART INDIA HACKATHON | WINNER 2024**
- Secured **1st place** at India's largest government hackathon, competing against **thousands of teams nationwide**.
- GOOGLE DEVELOPER GROUP GITS | AI/ML Lead**
- Led **AI/ML initiatives** and mentored students on machine learning projects, model development, and technical problem-solving.
