PROJECTS

[Covid-19 Real-Time Global Dashboard ↗](#)

Mar 2025 - May 2025

- Developed an end-to-end data pipeline for a real-time COVID-19 analytics system using Python, Pandas, MySQL, and Power BI. Extracted and cleaned large-scale datasets, performed data transformations, and stored structured data in MySQL databases. Enabled live data connectivity with Power BI for real-time updates and reporting. Focused on data ingestion, transformation, database integration, and building scalable data workflows to support analytical dashboards.

[Power BI Amazon Global Dashboard ↗](#)

Jan 2025 - Feb 2025

- Designed and developed a global sales analytics solution for Amazon by extracting, cleaning, and structuring large sales datasets using SQL and data processing techniques. Built optimized data models and calculated DAX-based KPIs such as Revenue, Profit Margin, and Shipping Cost. Enabled interactive and scalable reporting in Power BI with region-wise, country-wise, category-wise, and shipping-mode analysis to support data-driven business decisions.
